BIO & RESEARCH INTERESTS

I am a Staff Researcher at the AI Center of Samsung Electronics, specializing in computer vision, deep learning, and machine learning. My primary focus is on Vision-Language-Action (VLA) models for embodied AI and robotics, with the goal of building AI systems that can robustly perceive, reason, and act in complex, real-world environments.

I received my Ph.D. from Seoul National University, Graduate School of Convergence Science and Technology, under the supervision of Prof. Nojun Kwak, and was affiliated with the Machine Intelligence and Pattern Analysis Lab (MIPAL).

My past and ongoing research spans domain adaptation, domain generalization, continual/test-time adaptation, knowledge distillation, object detection, and semantic segmentation. Recently, I have been particularly interested in developing methods to make AI models more adaptive and generalizable to unseen scenarios.

Currently, my main research direction is advancing scalable and generalizable VLA models that integrate vision, language, and action generation for robotic control. I have hands-on experience with open-source frameworks such as OpenVLA, Physical Intelligence (PI0), and NVIDIA Isaac GR00T N1.5, and actively extend these platforms for robotic manipulation and decision-making tasks.

My long-term vision is to enable embodied agents that can learn continuously from diverse environments, follow natural language instructions, and perform complex physical tasks with minimal supervision.

EDUCATION

Seoul National University (SNU) Seoul, Korea — Mar. 2019 - Feb. 2024
Graduate School of Convergence Science and Technology (GSCST)
Department of Intelligence and Information
Ph.D. in Engineering

Yonsei University, Seoul, Korea — Mar. 2012 - Feb. 2019
B.S., Creative Technology Management & Computer Science

Technical University of Munich, Germany — Oct. 2016 - Aug. 2017
Exchange Student Program, Informatics(Computer Science)

SCSC (Samsung Convergence Software Course), Yonsei, Korea — Sep. 2015 - Feb. 2019
Educational program designed to educate non-SW major students to become SW expert

WORK EXPERIENCE

AI center, Samsung Electronics, Staff Researcher — Dec. 2024 - Present

SAIT, Samsung Electronics, Staff Researcher — Mar. 2024 - Dec. 2024

Qualcomm AI Research Korea, Research Internship — Jan. 2022 - July. 2022

Naver Webtoons Corp., Research Internship — Jun. 2020 - Dec. 2020

Republic of Korea Army, Sergeant — Oct. 2013 - Jul. 2015

PATENTS

Domestic Patents

Device for Unsupervised Domain Adaptation in Semantic Segmentation Exploiting Inter-pixel Correlations and Driving Method Thereof
patent application number : 1020220035170
patent application date : 2022.03.22

Device for Regression Scale-aware Cross-domain Object Detection and Driving Method Thereof
patent application number : 1020220035183
patent application date : 2022.03.22

International Patents

Method and Apparatus with Online Task Planning
patent application date : 2024.12.09

Method and Apparatus with Micro-Action Determination
patent application number : US19/208393
patent application date : 2025.05.14

Multi-Task Learning For Personalized Keyword Spotting
International Application No. : PCT/US2023/060959
International Filing Date : 2023.01.20

Dummy Prototypical Networks For Few-Shot Open-Set Keyword Spotting
International Application No. : PCT/US2023/060938
International Filing Date : 2023.01.19.07

PEER REVIEW EXPERIENCE

The 18th European Conference on Computer Vision (ECCV 2024) 1 paper. Oct. 2024

The Forty-first International Conference on Machine Learning (ICML 2024) 6 papers. Jul. 2024

37th Conference on Neural Information Processing Systems (NeurIPS 2023) 3 papers. Dec. 2023

International Conference on Computer Vision 2023 (ICCV 2023) 5 papers. Oct. 2023

The 16th Asian Conference on Computer Vision (ACCV 2022) 2 papers. Aug. 2022

The IEEE Transactions on Circuits and Systems for Video Technology. Nov. 2021

INDUSTRY PROJECT

Development of multimodal sensor-based intelligent systems for outdoor surveillance robots
Mar. 2019 - Jun. 2020, Jan. 2021 - Dec. 2021
LG electronics, ETRI, KIRO, **Seoul National University** and Ministry of Science and ICT
Developer

- **Description** : Developing object detection algorithm for outdoor surveillance robots using multi-modal sensors.

FUNDING

Samsung Electronics Ph.D. Student Sponsorship Program Sep. 2021 - Feb. 2024

HONOUR & AWARDS

The best paper award in the 3rd Workshop on Real-World Surveillance: Applications and Challenges at WACV2023, 1,000 USD — Jan. 2023

BK21 Graduate School Innovation Project Colloquium Outstanding Graduate Student Award
500,000 Won (About 420 USD) — Jul. 2021

Qualcomm Innovation Fellowship Korea 2020 Final Session, Finalist — Dec. 2020

Samsung Electronics - Seoul National University, Industry-Academic Cooperation Research Award
1,500,000 Won (About 1,300 USD) — Jul. 2020

Special Award, Yonsei Programming Contest 2018 — Spring Semester 2018

Honours, 1/3 tuition support scholarship, Yonsei University — Spring Semester 2016

LANGUAGE PROFICIENCY AND CERTIFICATE

OPIc(Oral Proficiency Interview – Computer) **Advanced Low (The highest grade)** — Mar. 2024
TOEFL(Test of English as a Foreign Language) **102 points** — Mar. 2020
Craftsman Computer Graphics Operation certificate — Oct. 2013
issued by Human Resources Development Service of Korea

Last updated: June 2025
